To work with a dynamic environment that will provide me with the opportunity for continuous learning and to grow professionally while utilizing my skills.

Education Qualifications:

M.C.A.	SRM University	2023-25	Pursuing
B.C.A.	CCS University	2020-23	1st Division
Senior Secondary	CBSE	2019-20	1st Division
High School	CBSE	2017-18	1st Division

Technical Skills:

Languages: Golang, PHP, SQL, C, C++

Other Skills: GitHub, Microservices, gRPC, Docker, Kubernetes

Knowledgeable in: Computer Networks, Operating System, Internet of Things

Experience:

Kushel Digi Solutions, New Delhi

Internship – Web Developer

Duration: Nov'21 – Jan'22

Worked on live client projects using Core-Php, MySQL, Xampp Server, HTML.

Academic Projects:

1. Project on Bed-n-Breakfast Reservation System

Technology/Skills Used: Golang, MySQL, MailHog, GitHub

Description: This project is based on an online reservation system for a bed and breakfast company named "Royal BnB". The application has secured session management and CSRF protection middleware which provides a decent level of security. Application admin can access all the data regarding reservations, guests. Admin has to log in and can go through the reservations, can update and delete them. The guest can search availability for the given room options, and can easily reserve the room & the reservation confirmation for the same is also sent to the guest via mail.

2. Project on Digital Notes application

Technology/Skills Used: Golang, MySQL, gRPC(API), MailHog, GitHub

Description: This project is based on a digital notes web application named "Scribble". After registration for the account, users will receive a welcome mail, user can log in into it's account and can also delete it permanently. Users can create different titles for the notes and are able to read, write, update and delete them. The application admin can access all the necessary application data like number of registered users, can update and delete their account. The application has secured session management and CSRF protection middleware which provides a decent level of security. Application will cover basic CRUD operations and gRPC (API) are used as and where needed.

3. Additional Projects (Using PHP)

Technology/Skills Used: Php, MySQL, Xampp Server, GitHub, HTML, CSS, JavaScript

Description: In total, I have completed **three** projects using core-PHP and MySQL database. These projects include **CMS application, an e-commerce store and a job portal**. The most basic project is the CMS application and the most complex one is the job portal. Code for my older projects can be found on my GitHub account and the link to my job portal project code is as follows.
